Handling Solutions

Taldeen Plastic Pallets are made with innovative injection molding technology using unique material saving designs. The high-quality plastic pallets match standard international sizes and meet industrial and commercial load bearing capacities. Taldeen is the only producer of pallets using structural foam technology in the region. SFM pallets have several advantages over injection molded (IM) pallets (design and durability).

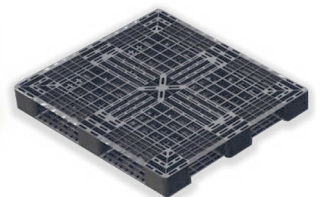

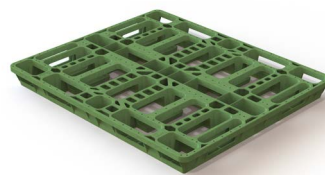

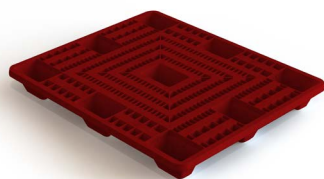

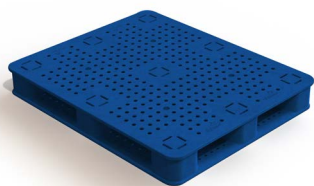

Taldeen Plastic Material Handling Solutions (MHS) facility has the technology and machinery to produce customised material handling solutions (boxes, crates, etc) based on customer design requirement.

High Value Features

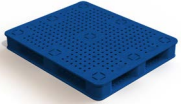

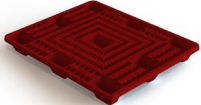

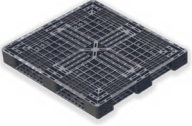

- Latest American and European technology.
- Better load bearing capacities.
- Various sizes, colors, and compositions available to suit your application.
- Compatible with current material handling systems.

Benefits:

- Environmentally safe, hygienic and easy to sterilize.
- Recyclable so the need to go to landfills is reduced.
- No staples, nails, screws, bolts, or splinters that can damage products.
- No contamination.
- Strong and durable.
- Longer life-cycle than alternatives so they are more economical.
- Chemically inert plus they do not rust or rot.
- Reduced worker fatigue and injury.
- Improved product stacking abilities.
- Possible to color code, improving product identification.

Description	Size (mm)	Weight (Kgs)	Application	
Structural Foam Snapfit pallet	1000 X 1200 x150	23	Heavy-duty. Food, beverage, mineral water, pharmaceutical and industrial applications.	
Structural Foam Nestable pallet	1000 X 1200 x125	14	Light-duty. Food and pharmaceutical applications.	
Structural Foam Petro pallet	1300 X 1100 x125	17.50	Medium-duty. Petrochemical and industrial applications.	
Light Weight Pallet	1300 X 1100 x135	9.5	Light weight. Petrochemical and other industrial applications.	

Features

Color: As per customer requirements

Material: PP or HDPE

Temperature: -20° to 45° C
